Art Unit: 1635

DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Response to Arguments

Claim Rejections - 35 USC § 112

2. Claims 1-12 remain rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. (Written Description and New Matter).

Applicant's arguments filed 7-22-04 have been fully considered but they are not persuasive. Applicants traverse the instant rejection on the grounds that the while it is acknowledged that the compounds exemplified in the specification were designed to target specific polynucleotide sequences encoding B7-1 and/or B7-2 proteins, the applicants submit that oligonucleotide sequence disclosed would also hybridize to sequences form different species, mutated sequences, polymorphic and allelic variants, and/or sequences that have an unspecified degree of identity (similarity, homology) which encode B7-1 or B7-2. In response to applicant's position, it is noted that the instant claims are not limited to the oligonucleotide sequences targeting human B7-1 or B7-2 as set forth in the specification as filed. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Application/Control Number: 09/851,871

Art Unit: 1635

Additionally, Applicants amended the instant claims to incorporate Genbank Accession No. MN_005191 (human B7-1) and Genbank Accession No. NM_175862 (human B7-2) in an effort to properly describe the claimed invention. However, it is noted that these GenBank Accession numbers are not set forth in the specification as filed, and are not properly incorporated by reference into the specification. Since these sequences were not a part of the original disclosure, this current amendment to the claims is considered new matter. Applicants must amend the claims and remove the new matter in response to this Office Action.

Moreover, the attempt to incorporate subject matter into this application by reference to the human B7-1 and B7-2 DNA sequences set forth in the non-patent publications of Freeman et al. J. Immunology, 1989, 143:2714, and Azuma et al., Nature, 1993, 366:76, is improper because these DNA sequences are required to properly describe the claimed invention, and are considered essential material. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

Art Unit: 1635

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Janet L. Epps-Ford, Ph.D. whose telephone number is 571-272-

0757. The examiner can normally be reached on Monday-Saturday, Flex Schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, John L. LeGuyader can be reached on 571-272-0760. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
